

Name - Dhana Koranga

Roll No - 2001056

Course - MCA-B

②

Problem statement - there are two organization in a city named GEU and GEHU. design a network between the soc department of GEU and GEHU. also show the communication between user number 1 of GEU and user number

Objective - To understand how to create a wired LAN using Switch

Description - steps for practical and parts snapshot of Network design.

Step 1 - In this step we will take one Router, two switches in which switch 1 contains user soc department and GEHU of soc department.

Step 2 - switch 1 (GEU of department) has connected with three devices PC1, PC2, PC3 & switch 2 has also connected with 3 devices that is PC3, PC4, & PC5

Step 3 - we set the IP address of device (user 1) GEU & device (user number 3).

Step 4 - in Realtime added sample PDU (P) from PC0 to PC4 which refers we send data from PC0 to PC4

Step 5 - see in simulation & Play, if wire show data transfer. data travel from source to destination

Step 6 - After Reached in destination, the destination send acknowledgment to the source.
